

# INTERNATIONAL DRONE DAY BOSTON 2016

THE INNOVATION AND DESIGN BLDG.  
23 Drydock Avenue Boston, MA  
Sat. May 7th, 11am - 4pm

Drones have a bad reputation, and even though many of us call our Multi-rotors by different names, the public does associate our fantastic machines with the word drone. We are here to make sure that Drones are seen in a positive light.

The purpose of International Drone Day is to show the world that drones are good, and can be used for many good purposes. Movie making, search and rescue, police work, architecture, inspections, emergency response, and for just having fun.

## Something For Everyone:

- FAA pilot registration stations
- Virtual flight simulator
- Safe flight education sessions
- Micro drones
- FPV racing
- Hardware show and tell
- Hobby shops
- Door prizes, and more!
